

- Chat

You are able to share your bets directly to chat, and to social media

Sticker Shop, system is available to provide "stickers" basically custom emoji's for sale for currency

- Profile

View your own and other player's last games & wagers, which also then can be verified with provably

fair system.

Check your VIP progress.

Check your affiliate/referral link.

Settings

Link your Discord, VK account and Google account

Hide your profile for other players

Hide your bids (basically hides player's name for other players)

Option to change to new name

Option to change to new avatar

Option to change your personal provably fair seed

- Language system

All text on website is localized, so can easily send out the localization file to get translated to all

languages.

- Insite (not browser push notification) notification system

Sends automatic notifications on events, such as deposits/withdraws processed, leveled up in VIP level.

Able to send custom notifications from admin panel at will.

- Multiaccount detection

Checks for same IP and also everytime logs in stamps a cookie into browser, so eventually even when

using mobile phone etc. will be caught if doing it bigger scale.

- Login auth supports Google / Discord / VK / Facebook

- Multi crypto support under nowpayments.io:

Multiplier to VIP/reward level can be set per individual crypto currency in admin panel (to boost certain crypto deposits when reserve gets low f.e.).

Can be individually toggled to have "bonus" currency per crypto.

Withdraws have to manually be accepted default, this can be changed per request.

Each deposit request generates a new crypto address.

History of deposits/withdraws is available.

datagamble

- Aggregator payment method support for any API
- Certified Provably fair system
 - Open source, provably fair system as used in other websites.
 - Client seed can be changed.
 - Calculator for each game is available and explanation.
- Theme switcher
 - Switch between themes once logged in, can change to seasonal festivities themes and so on. You can provide variables, such as colors, UI general box sizing etc.
- Game Options
 - Auto bet is supported.
 - Sound mute button.
 - Info/help button for specific game.
 - Stairs, tower, mines, keno are basically same games but different packaged and use the same multiplier.
 - Games are provably fair.
- Games:
 - Stairs
 - Classic Slots
 - Wheel
 - Dice
 - Diamonds
 - Crash
 - HiLo
 - Limbo
 - Roulette
 - Blackjack
 - Videopoker
 - Crash (limbo is basically solo version of crash)
 - Keno
 - Mines
 - Tower
 - Plinko
- Bonus systems:
 - All bonus systems can either payout in bonus currency (wager requirement) or regular instant withdrawable currency.
- Faucet
 - Spin wheel every 3 minutes, you need to have 0 balance to spin

- Reward program

Bonus % rakeback based on your wager dependent on your VIP level (basically you payout a % of the house odds back), which players have to manually take out each x period (set to weekly default).

- VIP Level system

Each wager gives experience towards your VIP level.

It is important to keep VIP level system rewarding in anyway, as it is a natural counter against possible multi accounting/affiliate abuse.

VIP level is shown as icon in chat next to player's name.

Currently VIP levels mainly would be used in combination of the Discord bot to spread promo-codes, as you level up you are able to use more VIP promocodes per day and get more % rakeback on the reward program.

Once you link your Discord, you automatically get access to VIP channels on Discord server to receive automatic promocodes.

- Reward player for enabling browser push notifications - or just market it for getting free promocodes, without giving initial reward (against abuse).

- Quiz System:

Automatically cron at random times a random quiz from a online trivia database, first one to answer correctly gets a set amount of currency added to their account - can also be started manually by admins with custom questions.

- Promocodes

Promocodes are actually provided in very unique way, intention of this system is first of all to generate traction while creating a "community" aura to keep long term customers in.

Promocodes are distributed automatically through Discord, in which the Discord bot automatically assigns the player's VIP level on our website. Each VIP level has access to exclusive VIP channels in which these promocodes are automatically/randomly posted by the bot.

Promo codes are distributed automatically through VK (Russia is a very big market) & Twitter, which makes people follow naturally your social media platform.

Promo codes are distributed automatically through browser push notifications (you are also able to set a bonus reward for those that initially activate browser push notifications), in which again you can attract players back with special offer.

datagamble

All promo codes have a set amount of currency and a maximum use limit.

- **Make it Rain**

Randomly every x hours it starts raining (or snow, configurable, seasonal) on the website giving out a

random amount to a number of players that have deposited x amount in past 24 hours.

- **Affiliate System**

Provides user with referral link to spread, configurable when user is considered "active" and thus rewards the initial inviter.
